Office Action Summary	Application No. 10/762,977	Applicant(s) MOLNAR	
	Examiner Kelly E Campbell	Art Unit 3618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-20 of copending Application No. 09/984,348. Although the conflicting claims are not identical, they are not patentably distinct from each other because they claim

common structural limitations with minor variation in claim recitation resulting in no structural difference between the applications.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 28 is rejected under 35 U.S.C. 102(b) as being anticipated by
Pulver (US 5,848,658).

Pulver teaches wheelchair (A) including:

a front caster means (62);

a means for driving the system, see Column 3, lines 12-18;

a means for suspending the front caster means (32) and the means for driving (not shown) in a dependent suspension orientation so that the means for driving can cause upward movement of the front castor means (62);

and the means for minimizing (60) the lateral movement of the front caster means when the front caster means (60) is moving in an upward direction, see Figure 3.

Claims 29-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Pulver (US 5,848,658).

Pulver teaches wheelchair (A) including:

A frame (12);

drive assembly (not shown), see Column 3, lines 12-18;

a first member (32,36) coupled to the drive assembly and including a pivot joint (34) connecting the first member to the frame;

a second member (50) having a second pivot (40) connecting to the frame (12);

at least one front caster (62) coupled to the second member (50);

a third member (60) having a third pivot (42) connecting to the first member (32,36) and a fourth pivot (64) connecting to second member (50), so that movement of the first member (32,36) causes movement of the second member (50) and the front caster (62) and including elastomeric member (52), see Figure 4A.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. McLaurin teaches a wheelchair with a front mounted castor and linkage assembly. Gill et al teaches a front mounted castor assembly for a wheelchair. Degonda et al teaches a wheelchair with anti-tip configuration. Schaeffner et al teaches a power wheelchair and castor wheel assembly. Dickie et al teaches an anti-tip wheel with a first and second linkage for moving a caster

wheel vertically and laterally. Watanabe teaches a caster assembly. Tuluie teaches a suspension assembly for a wheel with a first and second linkage. Goertzan teaches a power wheelchair anti-tip wheel assembly. Clark teaches a power wheelchair anti-tip wheel assembly.
